

Dear Amanda

28 April 2016

This letter serves as a follow-up on our meeting in Sandton on 14 April 2016 on the research to be conducted this year to measure the impact of the YCAP competition. A paper based survey and follow-up focus group interviews will be used as research methodologies for the before and after study to assess learners' and educators' responses to the impact of the project on learners with regard to four constructs, namely leadership, self-esteem, sense of empowerment and skills.

Ethical clearance was granted by Unisa's College of Human Sciences' Ethics Committee on 4 February 2016. The value of the YCAP competition will thus be supported by inferential statistics as well as rich data from the focus groups.

Yours sincerely

Prof Charmaine du Plessis
Mrs Ashiya Abdool-Satar
Dr Sheila Mokoboto-Zwane
University of South Africa
